

Term enrichment (Reactome)

Vasopressin regulates renal water homeostasis via Aquaporins

Signaling by Interleukins

Signaling by GPCR

Signal Transduction

PLC beta mediated events

Platelet activation, signaling and aggregation

Peptide ligand-binding receptors

Opioid Signalling

Intracellular signaling by second messengers

Interleukin-10 signaling

Interferon Signaling

Interferon gamma signaling

GPCR downstream signalling

Glucagon signaling in metabolic regulation

G alpha (z) signalling events

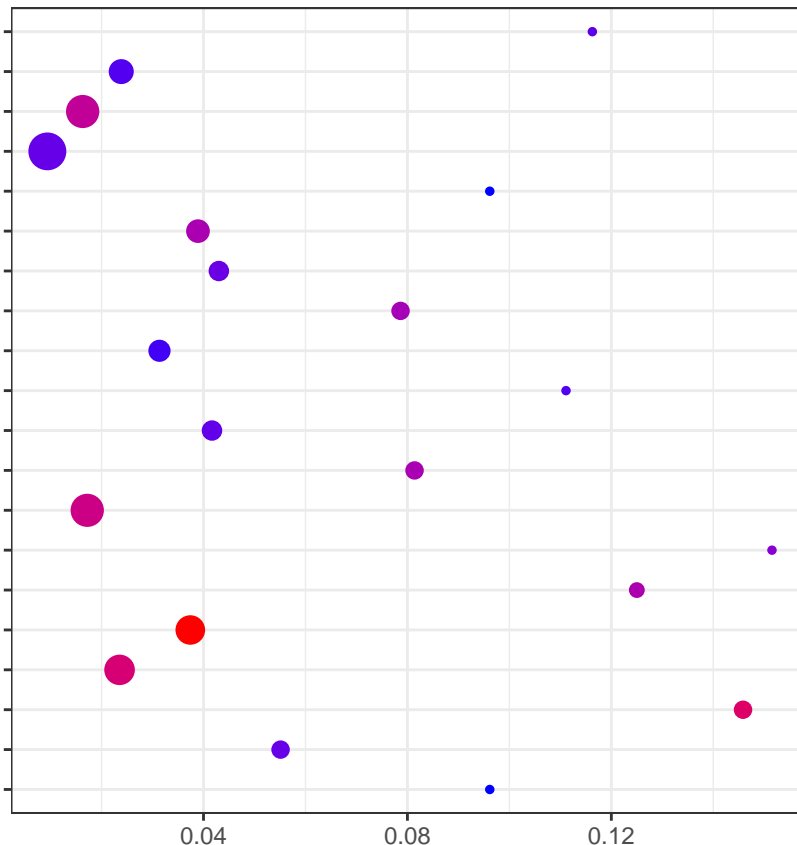

G alpha (i) signalling events

Cytokine Signaling in Immune system

Chemokine receptors bind chemokines

Cell-Cell communication

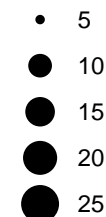

Aquaporin-mediated transport

-log₁₀(P.value)

Gene number

Rich Ratio
